

Product Overview

WHAT IS SMART SEAL™ ?

It is a web-based software application that is designed to automate the management documentation, and configuration control of valve packing, gaskets, and pressure seals. SmartSeal™ uses a system of FUTURE, INSTALLED, and HISTORY statuses to accurately maintain a standard revision process flow.

SYSTEM SECURITY

Users can be assigned to one or more security modules including read-only, data entry, administrator or custom modules built by an administrator. Each module can toggle security function independently to better maintain data integrity and site security. Users can then be assigned to one or more facilities for data entry purposes.

Features / Benefits

- Customizable Data Sheets
- Web Based
- Configurable Entry Screens
- Database Driven
- Multiple Data Sheet Support
- Easy to Implement
- Multiple Facility Support
- Low Maintenance
- Application Security
- Minimal Training
- Materials Data Sheet
- Multi-User

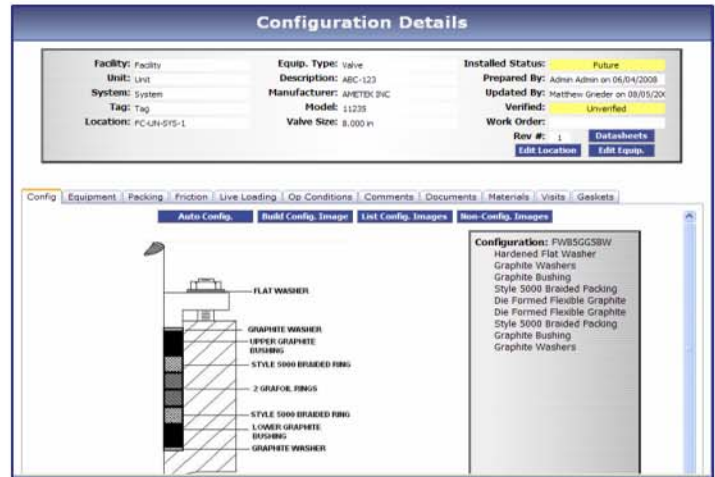

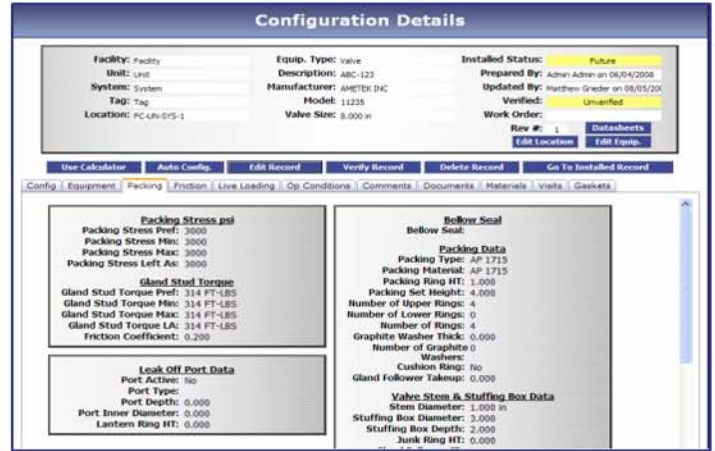

IMAGE LIBRARY

An Image Library of several hundred packing configurations are provided.

DOCUMENT MANAGEMENT

Related documents can be uploaded and associated to component records.

MATERIALS MANAGEMENT

Materials are stored in a searchable catalog and are easily associated to a component, or can easily be added at the record level.

EQUIPMENT VISITS

General, Re-Torque, Diagnostic and custom visits are logged and archived.

CALCULATOR

Built in calculator to easily manage record data.
