

Individual Tracking

SEARCH FOR INDIVIDUALS

Nuclear In-Processing Xpress (NIX) provides easy interfaces to search for and find information on any individual who has ever requested access or held access at a nuclear site. Several search screens allow for both simple and advanced searches to find an individual quickly.

INDIVIDUAL DATA

Individual data is securely stored in the application and gives access authorization personnel quick and easy access to all information around an individual. The application provides complex audit tracking capabilities on all necessary fields that shows when information was collected and changed, as well as, who performed the change.
